AB - J59042954 Prodn. of board such as metal-covered or decorative boards, useful for building walls and panels, is claimed. Improvement is that thermally insulated plates are attached to the edge of each hot plate such that a heat-reflective layer formed on one side of each heat-insulated plate faces inwards before forming the board.

- Heat radiation from the hot plates' edges and heat dispersion in the board are reduced.(0/1)
